About me

Motivated Java Backend Developer Intern with hands-on experience building scalable web applications using Spring Boot. Familiar with RESTful API design and relational databases (MySQL), and have worked with NoSQL databases such as MongoDB. Experienced in implementing authentication and authorization using Spring Security and JWT. Exposure to microservices architecture and real-time communication using WebSocket. Passionate about clean code, eager to learn, and always open to solving new backend challenges. GPA 8.0/10.

Education

2022 - 2026 Sai Gon University
Information Technology, majoring in Software Engineering
GPA: 3.25 Score: 8.0/10
Scholarship: 3 times (*Merit-based Encouragement Scholarship*)

Skills

Database MySQL, Redis, MongoDB	Languages Java, JavaScript	English IELTS 5.0 (practice test)
Version Control Git/GitHub	Backend Spring Boot, Servlet, REST API, WebSocket, Microservices (exposure)	Frontend (basic) ReactJS, JSP
Tools Docker, Swagger, Git, Clean Code	Security & Integration Spring Security, JWT, Paypal API	

Achievements

- **Hackathon 2025 (Top 2) - Sai Gon University:** Built an AI-powered learning assistant using OpenAI APIs, integrated into a web platform. Led backend development, applied problem-solving skills and rapid prototyping to deliver a working demo in 24 hours. [GitHub Repository](#)

Projects

12/2024 - Present	Calligo	
	Description:	A real-time messaging and calling platform built using a microservices architecture. It supports instant messaging, voice/video calls, and real-time notifications.
	Members:	1 member
	My roles:	Designed and implemented the entire system, covering database architecture, backend logic, and frontend UI/UX. Managed authentication, WebSocket-based real-time communication, message storage.
	Technology:	
	Database:	MongoDB, Redis, MySQL
	Backend:	Spring Boot, Kafka, WebSocket, JWT, Microservices Architecture, Observe pattern
	Frontend:	ReactJS, Ant Design
	GitHub:	Backend Repository Frontend Repository

10/2024 - 12/2024	Flight Management System	
	Description:	Website for managing flight bookings, with features like easy ticket booking, email notifications, VNPAY payments, flight management, comments, Excel report generation, and secure role-based access control.
	Members:	7 members
	My roles:	Designed the database, set up the backend framework, and implemented core features such as user authentication (login/register/forgot password) using Spring Security and JWT. Developed email notification functionality, Excel export, RBAC, and API documentation with Swagger.
2/2024 - 5/2024	Technology:	Spring Boot, MySQL, ReactJS, Ant Design, Docker, Swagger
	GitHub:	Backend Repository
		Frontend Repository
2/2024 - 5/2024	SGU Test	
	Description	A comprehensive quiz management platform designed for teachers and students. Teachers can effortlessly create quizzes, monitor student performance, and import/export questions easily.
	Members	4 members
	My roles	Developed a dynamic question creation feature, implemented Excel question importing, handled CRUD operations, designed statistical visualization with Chart.js, and created a landing page with animations.
	Technology	Servlet, JSP, MySQL, HTML, CSS
	GitHub	Github Repository
