About me

I'm a final-year IT student with real project experience in **full-stack web development**, using **ReactJS** for the frontend and **Spring Boot** for the backend. I've worked on team projects where I handled backend logic, API development, authentication (JWT), and also built frontend UIs with React and Ant Design. I'm comfortable working with MySQL, MongoDB, Git, and tools like Docker and Swagger. I enjoy learning by doing and improving my code step by step.

Education

2022 - 2026 Sai Gon University
Information Technology, majoring in Software Engineering
GPA: 3.32/4 (8.1/10)
Scholarship: 4 times (*Encouragement Scholarship*)

Skills

Database MySQL, Redis, MongoDB	Languages Java, JavaScript	English IELTS 5.0 (practice test)
Version Control Git/GitHub	Backend Spring Boot, Servlet, REST API, WebSocket, Microservices architecture	Frontend ReactJS, JSP
Tools Docker, Swagger, Git, AWS-EC2	Security & Integration Spring Security, JWT, Paypal API	

Achievements

- **Hackathon 2025 (Top 2) - Sai Gon University:** Built an AI-powered learning assistant using OpenAI APIs, integrated into a web platform. Led backend development, applied problem-solving skills and rapid prototyping to deliver a working demo in 24 hours. [GitHub Repository](#)

Projects

12/2024 - Present	Calligo	
	Description:	A real-time messaging and calling platform built using a microservices architecture. It supports instant messaging, voice/video calls, and real-time notifications.
	Members:	1 member
	My roles:	Designed and implemented the entire system, covering database architecture, backend logic, and frontend UI/UX. Managed authentication, WebSocket-based real-time communication, message storage.
	Technology:	
	Database:	MongoDB, Redis, MySQL
	Backend:	Spring Boot, Kafka, WebSocket, JWT, Microservices Architecture, Observe pattern
	Frontend:	ReactJS, Ant Design
	GitHub:	Backend Repository Frontend Repository

10/2024 - 12/2024	Flight Management System	
	Description:	Website for managing flight bookings, with features like easy ticket booking, email notifications, VNPAY payments, flight management, comments, Excel report generation, and secure role-based access control.
	Members:	7 members
	My roles:	Designed the database, set up the backend framework, and implemented core features such as user authentication (login/register/forgot password) using Spring Security and JWT. Developed email notification functionality, Excel export, RBAC, and API documentation with Swagger.
2/2024 - 5/2024	Technology:	Spring Boot, MySQL, ReactJS, Ant Design, Docker, Swagger
	GitHub:	Backend Repository
		Frontend Repository
2/2024 - 5/2024	SGU Test	
	Description	A comprehensive quiz management platform designed for teachers and students. Teachers can effortlessly create quizzes, monitor student performance, and import/export questions easily.
	Members	4 members
	My roles	Developed a dynamic question creation feature, implemented Excel question importing, handled CRUD operations, designed statistical visualization with Chart.js, and created a landing page with animations.
	Technology	Servlet, JSP, MySQL, HTML, CSS
	GitHub	Github Repository
