About me

I am a final-year Information Technology student with a short-term goal of gaining practical experience through my internship and a long-term goal of becoming a professional software developer, contributing to large-scale projects and building a sustainable career in the tech industry.

Education

2022 - 2026 Sai Gon University
Information Technology, majoring in Software Engineering
GPA: 3.32/4 (8.1/10)
Scholarship: 4 times (*Encouragement Scholarship*)

Skills

Database MySQL, Redis, MongoDB	Languages Java, JavaScript, PHP
Version Control Git/GitHub	Backend Spring Boot, Servlet, REST API, WebSocket, Microservices architecture
Tools Docker, Swagger, Git, AWS-EC2	Frontend ReactJS, JSP
	Security & Integration Spring Security, JWT, Paypal API

Achievements

- **Hackathon 2025 (Top 2) - Sai Gon University:** Built an AI-powered learning assistant using OpenAI APIs, integrated into a web platform. Led backend development, applied problem-solving skills and rapid prototyping to deliver a working demo in 24 hours. [GitHub Repository](#)

Projects

12/2024 - 06/2025	Calligo
Description:	A real-time messaging platform built using a microservices architecture. It supports instant messaging, and real-time notifications.
Members:	1 member
My roles:	Designed and implemented the entire system, covering database architecture, backend logic, and frontend UI/UX. Managed authentication, WebSocket-based real-time communication, message storage.
Technology:	
Database:	MongoDB, Redis, MySQL
Backend:	Spring Boot, Kafka, WebSocket, JWT, Microservices Architecture, Observe pattern
Frontend:	ReactJS, Ant Design
GitHub:	Backend Repository Frontend Repository

10/2024 - 12/2024

Flight Management System

Description:

Website for managing flight bookings, with features like easy ticket booking, email notifications, VNPAY payments, flight management, comments, Excel report generation, and secure role-based access control.

Members:

7 members

My roles:

Designed the database, set up the backend framework, and implemented core features such as user authentication (login/register/forgot password) using Spring Security and JWT. Developed email notification functionality, Excel export, RBAC, and API documentation with Swagger.

Technology:

Spring Boot, MySQL, ReactJS, Ant Design, Docker, Swagger
